

Introduction To Web Development

HTML

CSS

What is Web Dev?

- Web development is the process of creating, building/developing and maintaining the websites.
- Web development is made up of 2 words, web and development.
- Web can be websites, web apps, web pages, etc., that is served over internet.
- Development is the process of building those web apps, web sites, etc.,

Types of Web

- There are basic 2 types of websites
 - Static
 - Dynamic.
- Static websites are those where the content stays the same
- Dynamic websites are the sites where the content gets updated dynamically.
